

RM SERIES 800W-3.0kW MODULAR AC-DC RECTIFIERS

Efficient and reliable, these modular rack mount rectifiers allow for easy paralleling of modules to provide redundancy or higher power outputs. Designed for use in modern telecommunications networks these rectifiers offer unrivalled power densities.

“Plug and play” installation allows quick and easy installation and system expansion. These robust, reliable rectifiers are forced cooled by a speed controlled and monitored high reliability fan.

Modules are New Zealand made to guarantee design, manufacture and process integrity. Our robust proven conversion topology utilises only highest specification components - unfortunately something rarely offered by others.

- **Forced cooled.**
- **Thermally protected.**
- **Power factor corrected.**
- **Input/output voltage and current protected.**
- **Serial alarm and control interface.**
- **Microprocessor controlled.**
