LFeLi 48200 — Multi-protocol

LiFePO4 specifications

FEATURES

Longer Cycle Life - Offers up to 20 times longer cycle life & 5 times longer calendar life than lead acid batteries, minimizing replacement cost.

Superior Safety - Lithium Iron Phosphate chemistry eliminates explosion risk combustion due to high impact, overcharging or short circuit situation. First life battery.

Higher usable capacity - Delivers high power, while maintaining cycling of double energy capacity of lead acid battery.

Wider Temperature Range- -20°C ~ 60°C.

Lighter Weight - About 40% of the weight of a comparable lead acid battery. A 'drop in replacement for lead acid batteries.

Multi-protocol communication - Multiple protocols that can be selected via PC with an included RS232 cable.

Pre-Charge - The battery comes with a capacitor charging feature for high inrush current, as well as a charge current limiter.
