Progress Depends on Infrastructure That Performs

Electricity, communications and industrial systems are not simply assets
They are the foundations on which economies, organisations and communities depend.

Average exists to help make this infrastructure safer, more reliable and future ready

TECHNICAL CAPABILITY

Combining quality solutions, industry knowledge and dependable technical support to protect critical assets, strengthen operational resilience and support service continuity.

LONG-TERM PARTNERSHIPS

Working closely with customers and industry specialists to protect critical infrastructure assets and improve long-term safety, reliability and performance.

DEPTH OF EXPERIENCE

Our leadership team combines engineering and executive experience in the Energy, Telecoms and renewable industries

BROAD INDUSTRY EXPERIENCE

Supporting utilities, municipalities, rail operators, mining companies, airports, hospitals, medical centres, data centres, telecommunications networks, EPC contractors and industrial customers — including environments with critical systems and sensitive medical or electronic equipment.

Your Infrastructure Company That Matters

We deploy global technologies and capability in the local market, helping customers select, deploy and support solutions with confidence.

Proudly RMB Corvest Company

01

Energy

Power cable solutions for the overhead and underground networks, adhering to international standards that provide customers with piece of mind

02

Telecommunications

Fibre optic solutions in the inside & outside plant environment, improving operational efficiencies, while maintaining a 25-year design life

03

DC Power

Energy generation & storage solutions for the commercial and industrial environment, tailored to the customers requirement Surge & Lightning protection for ultimate asset protection

04

Energy Management Solutions

Operations & Maintenance – comprehensive infrastructure audits on installed systems, optimizing the ROI and the Reduction of unplanned outages EPC of grid-tie and BESS solutions

ONE INTEGRATED CAPABILITY

Average supplies specialist products and engineered solutions that help **build, connect, protect and maintain** critical infrastructure and essential assets.

Protecting critical assets. Supporting essential services. Strengthening resilience.

Energy

Overhead line products (MV, HV, UHV) and underground cable accessories (LV, MV)

Overhead line and underground cable products for utilities, municipalities and rail networks — ranging from LV through to 765 kV.

OUR PRODUCT OFFERING

- Insulators — LV, MV and HV, porcelain, glass and polymer
- Surge arresters — distribution and station class
- Fuse cut-outs — MV, polymer and porcelain
- ABC accessories — LV cable accessories
- Cable accessories — MV and LV joints and terminations, heat and cold shrink, and LV resin joints
- Live-work equipment — insulating gloves, sleeves, blankets and hot-line tools
- Traction equipment — insulators, surge arresters, connectors and cable accessories

WHY IT MATTERS

- Eskom, NTCSA and Transnet approved products
- Proven track record, with multiple long-term approvals
- Technical support

TYPICAL APPLICATIONS

Overhead distribution and transmission lines

Substations

Electrified rail networks

ESKOM, NTCSA AND TRANSNET
APPROVED

LV TO
765 KV

MULTIPLE LONG-TERM SOCS CONTRACT
AWARDS

Telecommunications

Fibre product solutions for inside and outside plant – Datacenter, long-haul, FTTX and mobile providers

OUR PRODUCT OFFERING

- Civil material — HDPE duct in 75, 110 and 160 mm, microduct, subduct accessories, manholes and boundary boxes
- Fibre management — dome splice enclosures, patch panels and termination boxes
- Fibre cable — drop, microduct and aerial
- Fibre optic assemblies, splitters and aerial hardware
- Full product training and technical support

WHY IT MATTERS

A fibre build stalls on whichever component is missing. Supplying civils, cable, management and assemblies from one source removes the gaps between suppliers.

Averge also develops locally manufactured high-density panels and compact closures for FTTH and FTTA/PTTA, supporting 5G rollout with product designed for local conditions.

TYPICAL APPLICATIONS

FTTH network builds

FTTA/PTTA and 5G site connectivity

Underground and aerial deployment

ONE-STOP FIBRE
SUPPLY

LOCALLY DEVELOPED FTTH AND 5G
PRODUCT

PRODUCT TRAINING AND TECHNICAL
SUPPORT

DC Power

Energy generation and storage solutions that protects critical infrastructure

OUR PRODUCT OFFERING

- 48 V rectifier systems, modules rated above 96% efficiency
- Batteries — OPzV/OPzS, AGM, gel, pure lead, pure lead carbon, lithium telecom, sodium ion and sodium-nickel
- LFP lithium batteries with integrated BMS for Solar applications
- Grid-tie and BESS solutions for commercial and Industrial markets
- Surge and lightning protection for commercial, Industrial and critical power applications

WHY IT MATTERS

When a base station fails, vital communication is disrupted. Averde provides high-quality, approved solutions and expert services designed to maximise site reliability, maintain network availability and meet critical uptime requirements.

TYPICAL APPLICATIONS

Mobile operator base stations

Data centres and control rooms

Industrial and commercial backup

BATTERIES AT 4 000+ BASE STATIONS

650 RECTIFIER SYSTEMS INSTALLED

50 AC/DC INSTALLATION TEAMS

Energy Management Solutions

O&M, digital monitoring, asset optimisation and specialised services.

OUR PRODUCT OFFERING

- Site audits to validate SANS compliance
- Energy audits — tariff verification, maximum demand and penalty review, negotiation on the client's behalf
- Digital monitoring and asset optimisation
- EPC for Grid-tie and BESS solutions
- Power factor correction, Surge & Lightning assessment

WHY IT MATTERS

Most infrastructure does not fail suddenly. It degrades quietly while nobody is watching

TYPICAL APPLICATIONS

Commercial and industrial solar and storage

Base station audits and Certificates of Compliance

Energy audits and tariff optimisation

987 KW INVERTER, 716 KWP SOLAR, 607 KWH STORAGE
INSTALLED

3 500 CERTIFICATES OF COMPLIANCE
ISSUED
